BRLEN Ten miles tarther south, has come into prominence from the fact that John Becker, the extensive miller, got the highest premium on wheat at the World's Pair This notable event has brought not only Belen to the front, but New Mexico as well. The vicinity of the little town is a garden spot, and like that of Los Lunas, a capable of raising the finest grapes in the United States. The past year has been an exceptionally good one for grapes, the wines being superior to any made in afteen years. Owing to the great surplus of grape brandy, no grape brandy will be made this year. No distillers sell any grape brandy until it has an average of three or four years. The New Mexico grape brandies, as well as wines, are regarded by many as superior to those of California, and should be better advertis-

ing for a siding from the Santa Fe main line to his enlarged milling property in Belen. The engineer has just been here, and on Saturday left to report at head-

quarters favorably. The branch will be about a mile long, and it is expected it will be laid in a few weeks.

Lee Lunas and Belen are liberally supplied with Tun Cryrans, and the list will increase benceforth.

Good service by rail is made daily with both towns, though many drive from Alouquerque and return the same day PITTOCK.

Some School Statistics

The superintendent of the public schools has been interesting himself in the habits of the pupils, especially of the boys of outside of the regular school branches. Greater and more interested efforts

should be put forth by parents and quence he was outrageously associated teachers, for the moral training of the and shot. The wounded man was taken boys. All know, whether they fully real- alive, and is still considered in a precar ize it or not, the injurious effect of cigarette smoking and the use of tobacco upon the health of boys, who need all the strength nature gives them for the vigorous development of their bodies. Without physical strength and energy there is ess chance for mental development. The foundation for all growth should be haid with care and wisdom.

The importance of good reading for children and young people should be fully understood. It is said that a man's haracte, is known by the company he keeps. Reading is but a form of companionship, and the character of the readng will tend to form the thoughts and control the actions of him who reads. Hence the great necessity for good readng as well as good company.

The following statistics have recently been gathered from the different grades: In the high school 75 per cent. of the boys have already had more or less experience in the use of tobacco in some form; in the grammar and intermediate grades, 43 per cent., and 20 per cent of he little boys in the primaries. In the high school 50 per cent , at times, indulge in profanity; in the grammar and intermediate, 50 per cent., and in the primaries, 35 per cent. In the high schools 35 per cent. spend time playing on the streets in the evening; 50 per cent. study across the Rio Grande has been lacking at home; 20 per cent. read novels; 20 per cent, follow such reading as detective stories; 15 per cent. are carrying out a line of solid study, and 80 per cent read newspapers, periodicals and maga-

CLEVER WORK OF OFFICE OR

From Saturday's Chile.

Last night Anastacio del Valle, Polonio Gutierres and Tiburcio Lujan, of Bernalillo, were arrested, brought to the city and lodged in jail here, charged with felonious assault; in other words attempting to murder one Jerry Hickey.

The facts in the case are about as for ows: On the evening of the 9th of Deand which was published in THE CITIZES at the time, that White Cape had brutally assaulted, shot, and left for dead Jerry "In making out the annexed statement Hickey, a section laborer on the Santa Fe road, near Bernalillo
